OUR STORY

What do we do?
Design, develop and manufacture gas sensing products and systems tailored to your application or custom needs.

Where are we?
Our HQ is based in Stokesley, UK and we also have an office in California, USA. Our distributor network spans every continent.

Who are our target markets?
- Labs
- Medical
- Diving
- Military
- Green Energy
- Beverage
- Gas Blending & ASU (Air Separation Units)

Where are our products used?
- Agricultural research labs to combat methane release
- Comprehensive submarine atmosphere monitoring systems to keep our submariners safe
- Deep sea diving bells, we are the only company in the world who can monitor hydrocarbons at 300m under the sea in 95% RH
- Our oxygen sensors protect astronauts in space exploration
- Breath analysis for patient diagnosis of gastrointestinal diseases
- Biomass plants to enable production of green energy
- Diners, bars, fast food restaurants to protect staff from CO2 leaks
- Our oxygen monitors protect key medical workers in hospitals
OUR VALUES

Our **CUSTOMERS** are at the ❤️ of what we do

We are **PROUD** of what we do

We operate **ETHICALLY** and do the right thing

We are **BOLD**, we are prepared to work out of our comfort zone

WHY CHOOSE US?

We are **DEDICATED** to you: your safety, your process, your application.

We love a **CHALLENGE** and will develop a **SOLUTION** just for you.

We have a tonne of **EXPERTISE** and lots of gas gurus working for us.

And did we mention we make stuff to send into **SPACE**?

*(Psst, just don't ask us who we work with on this......

it's **TOP SECRET - CLASSIFIED** info...)*
If you’re a little unsure as to which sensor or analyser is right for you, follow this helpful guide...

Do you want a **Safety Monitor**?

Do you need it **wall mounted**?

Are you using **CO₂**?

Are you using an **inert gas** or **O₂**?

Do you want a **Process Analyser**?

Contact & Discuss

Check out **Venus Pro** on p. 28
Are you located in the USA?

- YES:
  - Check out Ax60+ CO₂ on p. 22

- NO:
  - Do you want relays or multi point monitoring?
    - YES:
      - Check out Ax60+ CO₂ on p. 22
    - NO:
      - Check out A50 on p. 20

Do you want a Data Logging or Man Down Alarm?

- NO:
  - Check out CO₂BUDDY on p. 24

- YES:
  - Check out Safe-Ox+ on p. 12

Do you need it wall mounted?

- YES:
  - Check out Aspida on p. 16

- NO:
  - Check out Aspida on p. 16

Contact & Discuss

...still unsure? Please get in contact with us today! We're happy to help!
We realise that each lab layout is unique, which is why we have designed our systems to offer you full flexibility.

**Layout**
- Carry out a risk assessment to determine correct positioning
- Use alarms/repeaters at the entrance to warn staff of a gas leak
- Portable, personal alarms add an extra layer of protection and can act as a backup system

**Cylinder Storage**
- Store in a well ventilated area
- Store your full and empty cylinders separately
- Store your O2 cylinders away from toxic and flammables
- Rotate your stock and ensure you use the oldest cylinders first
- Use appropriate signage

Example Layout
SAFETY MONITORS
OXYGEN (O₂)

Oxygen, we all know we need it to live so why can it be so dangerous? The optimal level of O₂ to support life is 20.9%. Slightly too much or too little can pose many risks.

Too little O₂ and the body suffers from hypoxemia, causing it to shut down. Effects can range from headaches and shortness of breath to affecting the heart and brain and sadly ends in death.

Too much O₂ causes a condition called hyperoxia, this causes the central nervous system to shut down, damages airways and as with too little O₂ can end with loss of life. Enriched O₂ also poses an increased fire and explosion risk.

By monitoring the atmosphere with gas detection you are ensuring staff and your site are safe from these risks. It also enables you to meet regulations such as OSHA and EH40.

So, who needs an O₂ monitor? Anyone using either an inert gas (N₂, Ar, He, LN₂) or O₂ in their labs.

APPLICATIONS

Gas Chromatography
  Carrier gases
Mass Spectrometers
  Cryogenics
Specimen preservation & storage
Pharmaceuticals
  Research
Liquefaction
Clean Rooms

TOP TIP!

An O₂ monitor will not protect you from CO₂ exposure, this is a myth. If using CO₂ you need a CO₂ monitor.
SAFE-OX+

A single point, wall mountable O₂ enrichment and deficiency monitor.

Protect your staff, visitors and site from a leak of enriched O₂ or an inert gas such as LN₂, Ar or N₂. The Safe-Ox+ will alert your team to any dangerous rise or fall in gas levels of O₂ so they can take action and stay safe.

Features

- Plug-in & Go - install in minutes
- Digital display (on sensor unit)
- Includes main sensor unit & remote repeater (to protect lab entrance)
- User maintainable
- Ambient air monitor

Example setup

Part No: AX1BK20X56Q2Y51

Includes 2 relays, 110V US Power supply, quick connect repeater.

Unlike most O₂ sensors, our Safe-Ox+ can be used in Helium (He) environments.
## Why Analox?

The Safe-Ox+ reached the final of the S-Lab (Sustainable Laboratories) Awards for ‘**Best Innovative Product**’

Ax60+ O₂

A multi-point wall mountable O₂ enrichment and deficiency monitor.

This flexible O₂ system is ideal for larger labs or sites with multiple labs or gas storage areas requiring monitoring. It will protect your staff, visitors and site from a leak of enriched O₂ or an inert gas such as LN₂, Ar or N₂. The Ax60+ will alert your team to any dangerous rise or fall in O₂ levels so they can take action to stay safe.

Features

- Digital display (on central unit)
- Includes central unit, 1-4 sensors and 1-4 alarm units
- 2 relays
- 5 year electronics warranty
- User maintainable
- Ambient air monitor
- Quick connect or hard wired options

Example setup

Part No: AP202

Includes 2 sensors, 2 white alarm strobes, quick connect system, universal power supply.

You can also add CO₂ sensors to the Ax60+ O₂ system offering protection from multiple dangers.

**FACT**

*Krypton* is one of the **rarest inert gases** on the planet. In atmospheric air there is around 1 ppm of Krypton gas *(Which is why there are no superheroes...)*

**Why Analox?**

We meet all of these standards...  

**Spares & Accessories**

- **Part No:** P0159-4150-EN  O₂ Safety Signage Pack (English)  
- **Part No:** P0159-4305K  Sensor Protector Kit  
- **Part No:** AX60SCQYA  Additional O₂ sensor (QC)  
- **Part No:** AX60RQYCA  Additional White Alarm Strobe (QC)  
- **Part No:** US-4000-0159-0020  Gas shut off valve

The *Aspida* O₂ (Personal Alarm) p. 16

Want to know more?  
Click above for the full tech-spec!
ASPIDA O₂

A personal, portable O₂ enrichment and deficiency monitor.

With the Aspida on your side you can rest assured you are safe. This portable O₂ alarm unit is ideal for staff working in a lab with enriched O₂ or an inert gas such as LN₂, Ar or N₂. Just clip it to your belt and get on with your job knowing it will alert you to any dangerous gas leaks.

**Features**

- Digital display
- Data logging function
- Data for 2 users can be logged (shift workers)
- Man down alarm (for lone workers)
- 15 hours battery life per charge
- User maintainable
- Maintenance reminders

**Example setup**

**Part No:** ASPBA01YU01

Includes man down alarm, O₂ sensor and 9V DC mains charger with a universal plug.

You can also add a CO₂ sensor to the Aspida offering protection from multiple dangers.

FACT
‘Aspida’ is Greek for ‘Shield’ - let us protect you.

Why Analox?
The Aspida was the first gas alarm to feature a man down / panic alarm. This can be triggered by the user or will automatically go off after a period of stillness should the user collapse.

Spares & Accessories
Part No: 9100-1020RK  Replacement O2 sensor and tool
Part No: 9300-1009K  Wall mount kit for handy storage when not in use
Part No: PGA-607  Car charger 9V DC - for techs on the move

You may also like...
The Ax60+ O2 (Wall mount monitor) on p. 14
CARBON DIOXIDE (CO₂)

CO₂ is present in the atmosphere at levels of 0.04%, an increase to just 0.5% over a daily shift can cause harm to the human body. Symptoms can include: dizziness, headaches, difficulty breathing and ultimately asphyxia.

It is a toxic gas that cannot be detected with human senses, the only way to know you are protected is to use gas monitoring. Gas monitoring also ensures your facility is compliant with OSHA and EH40 regulations.

APPLICATIONS

- Incubators
- Sample preservation and storage
- Cell Culture
- Gas Chromatography
- Dry Ice
- Refrigeration
- Research
- Fire Suppression
- Appliance Testing

TOP TIP!

CO₂ is heavier than air so CO₂ sensors should be installed around 305 - 457mm above the ground.
A50

A wall mount, single point CO2 monitor.

**The A50 offers peace of mind,** just install it in your lab and it will alert your team to any rise in CO2 levels. This monitor is ideal for the smaller lab where CO2 or dry ice is used or your gas storage area.

*NOTE: Not recommend our US customers - please see the Ax60+ p. 22*

**Features**
- Plug-in & Go installation
- Includes main sensor unit and remote repeater alarm
- 5 year electronics warranty
- User maintainable
- TWA (Time Weighted Average) Alarm

**Example setup**

**Part No:** A50BC60X55QXXX01

Includes main sensor unit, remote repeater, quick connect cabling and 230VAC UK power supply.

The A50 comes with a **5 year sensor warranty.**
Why Analox?

Analox was the first company in the world to make CO₂ sensing affordable for all.

FACT

Dry ice is CO₂ in its solid form, using dry ice has the same health risks as using cylinders of CO₂.

| **Alarms**        | Audible & visual at 1.5% & 3%  
|                   | TWA alarm at 0.5% |
| **Calibration**   | Our unique software will automatically calibrate the sensor every 30 days |

Spares & Accessories

**Part No: REP50CXX01** Additional remote repeater for multiple entrance coverage

**Part No: 8000-9008** Splash guard to protect the sensor

You may also like...

The **CO₂BUDDY CO₂ (Personal Alarm)** p. 24
Ax60+ CO₂

A flexible, multi-point, fixed CO₂ monitor.

The Ax60+ is the ultimate lab mate to ensure the safety of your staff and visitors. This fixed CO₂ system is ideal for protecting workers in any lab using CO₂. It can monitor between 1-4 areas, so it’s perfect for larger facilities or for future expansion.

Features

- Digital display on central unit
- Strobe alarms available in white, blue or amber - your choice
- TWA (Time Weighted Average) alarm
- 2 relays as standard
- User maintainable
- 5 year electronics warranty

Example setup

Part No: AP1

Includes central display, 1 sensor, 1 blue strobe alarm, quick connect cabling and universal power supply.

You can also add O₂ sensors to the Ax60+ to protect from inert gas or enriched O₂ leaks.
**Sensor Life**
Over 5 years - after that, you just need a replacement sensor, you don’t need to replace the entire unit.

**Sensor Technology**
Infrared

**Alarms**
CO2 sensor alarm set points are pre-configured ready to meet:
- USA regs (OSHA, NBIC, NFPA and IFC):
  - TWA - 5000ppm (0.5%)
  - AL1 - 5000ppm (0.5%)
  - AL2 - 15000ppm (1.5%)
  - AL3 - 30000ppm (3%)
- European/International regs (EH40):
  - TWA - 5000ppm (0.5%)
  - AL1 - 15000ppm (1.5%)
  - CO2 - 30000ppm (3%)

Offering a quick, ‘out of the box’ installation. Set points can also be user configured to ensure compliance in any part of the world.

**Calibration**
Our smart software will ensure the CO2 sensor(s) automatically calibrate every 30 days

**Optional Outputs**
You can add 4-20mA and MODBUS RTU Comms - just ask us about the DOM (Data Output Module)

---

**FACT**
OSHA & EH40 regulations state you must not expose your team to levels of 1.5% CO2 for any more than just 15 minutes.

**Why Analox?**
The Ax60+ meets all of these standards:

**Spares & Accessories**
- Part No: P0159-4120-EN CO2 Safety Signage Pack (English)
- Part No: P0159-4305K Sensor Protector Kit
- Part No: AX60SAQYA Additional CO2 sensor (QC)
- Part No: AX60RQYBA Additional Blue Alarm Strobe (QC)
- Part No: US-4000-0159-0020 Gas shut off valve

CO₂BUDDY

A personal, portable CO₂ alarm unit.

With the CO₂BUDDY by your side you can rest assured you are safe. This portable CO₂ alarm unit is **ideal for staff working in a lab where CO₂ or dry ice is being used.** Just clip it to your belt or use the handy lanyard and get on with your job knowing it will alert you to any dangerous gas leaks.

**Features**

- Digital display
- Takes just 2 hours to fully recharge battery
- 48 hours battery life per charge
- 2 year sensor and electronics warranty
- User maintainable
- Includes belt clip and lanyard
- TWA (Time Weighted Average) alarm

**Example setup**

**Part No:** 4000-0244-0001

Portable CO₂ alarm, lanyard, belt clip and micro USB cable for charging.

Weighs less than 70g!
You won’t even know he’s there, **unless you need him.**

FACT

Enriched levels of CO₂ threatened the Apollo 13 astronauts who had to adapt cartridges from the command module to supply the carbon dioxide scrubber in the lunar module, which they used as a lifeboat.

Why Analox?

We have designed, developed and manufactured CO₂ sensors which were sent into space on a manned shuttle.

Spares & Accessories

CUSTOM GAS ANALYSERS

Precision gas analysis is critical for all types of labs, from private, academic, military, medical and research.
We understand that each of your projects have custom requirements so a standard analyser with rigid features just won’t cut it. Analox has designed a flexible, modular analyser which can be built to your specific requirements.

Need it to be wall mounted? Easy.
Need it to have a high pressure sample pump? Sure.
Need it to have multiple gas paths? We’ve got your back.

APPLICATIONS

Animal Emissions
Greenhouse projects
Military fitness testing
Missile Production
Aerospace Testing
O2 Candle Testing
CO2 Scrubber Testing
Combustion Research
VENUS PRO

A multi-gas, high precision analyser.

Research, compliance and analysis all require accurate gas measurements. The Venus Pro is a precision analyser capable of continually measuring up to 4 gases which can range from O₂, CO, CO₂ right through to CH₄, N₂O and H₂. Whatever your application, we have the analyser for you.

Features

- Digital display
- 3U/4U/6U rack mount or wall mount
- 4 relays
- 1-4 sensors per system
- 4-20mA & RS232 outputs

Example setup

Part No: 4000-0256-0005

Includes: 3U Rack Mount chassis, CO₂, CO, CH₄ & H₂ sensors, auto calibration function and sample pump.

The Venus Pro is truly customisable to your application. Speak to one of our team today.

SENSORS
Our unique range of OEM sensors offer simple integration into your own gas analysis systems or lab equipment.

Choose from a variety of gases and ranges offering the perfect solution for either trace ppm or pure gas measurements.

Our in-house development team can offer assistance with the integration as part of our service.

**APPLICATIONS**

- Breath Analysis
- Gas Cabinets
- Incubators
- MAP (Modified Atmosphere Packaging)
- Genetics
- Water Treatment
- Nutrition
- Gas Manifolds
- Fume Hoods
VENUS SOLO

A GFC sensor for integration into your system.

The Venus Solo offers you an easy sensing solution to integrate into your gas system or analysis equipment. It is available in a variety of gases and ranges from low ppm to purity (100%) measurements.

Features

- A choice of 5 standard gases: CO, CO₂, CH₄, NO and N₂O
- 0-2v Output
- On-board calibration control
- Status signal for device health check

Example setup

Part No: 4000-0254-2049
0-1000ppm NO sensor

The Venus Solo can also be used in the Venus Pro analyser, offering a full solution.
Why Analox?

GFC technology was first discovered in Japan, back in 1981, the same year as Analox began trading....it was a good year.

The Venus Solo is used on-board submarines to detect CO and keep submariners safe.

A dual beam CO₂ sensor.

The 5S MkIII uses highly stable infrared technology to detect CO₂ levels. This sensor is compact and versatile and ideal for integration into an incubator, gas cabinet or your own measuring system.

Features

- PPM or % measurements available
- 0-2v or 4-20mA outputs
- Die cast aluminium enclosure
- Warms up in 30 seconds
- Compact 115 x 65 x 40mm (excluding protrusions)

Example setup

**Part No:** A5S3ASN4S

CO₂ sensor with a range of 0-5000ppm and a 4-20mA output.

The 5S MkIII includes an **on board, barometric pressure sensor** compensating for the effect of atmospheric pressure.

A miniature sensor for integration.

The MEC sensor range can be used to measure: O₂, He, CO or VOC’s. **It's small, super accurate and long life making it ideal for OEM installs.**

**Features**

- PPM, % or mbar measurements available
- RS485 digital output
- User replaceable cells
- Compact 65 x 50 x 35mm
- IP65 enclosure

**Example setup**

**Part No:** MECCOBAP

CO sensor with a range of 0-20ppm in N₂, 150mm Lead, Plastic Enclosure.

The MEC has a built in pressure sensor to **compensate for atmospheric pressure swings.**
Why Analox?

Whether you require a 25 year service contract, online chat advice or access to a 24/7 emergency support helpline, Analox have it covered.

FACT

In World War II, petrol was rare and reserved for the military so many cars were converted to use wood gas. Which is carbon monoxide made by burning wood chips in an insufficient amount of air.

Spares & Accessories

Part No: 9100-2030
Replacement CO cell

Part No: 9100-9212-9HM
Replacement O2 cell

Additional 6 month warranty on all parts*  
Priority emergency service in the event of failure  
Parts discount of 15%  
24 hour Tech Support Helpline  
Annual ‘back to base’ service  
Collection & Redelivery |
| EINSTEIN    | **Einstein Package**  
Parts discount of 10%  
Annual ‘back to base’ service  
24 hour Tech Support Helpline |
| HAWKINS     | **Hawkins Package**  
Parts discount of 5%  
Annual ‘back to base’ service |

*Does not cover product issues due to misuse or customer damage.
HANDY HINTS
• Once your monitor is installed, **train your staff** on what it is, what each alarm level means and what action they need to take if an alarm situation occurs.

• **Install signage** near to the units to explain what it is, Analox can provide this.

• **Regularly practice a gas leak evacuation**, just like you do your fire evacuations drills.

• Ensure you are clear on what upkeep the system needs and **set reminders for preventative maintenance**. If you're not sure, get in touch with us.

• The systems are electrical items and are not waterproof. **They should never be sprayed with water or chemicals during cleaning.** You can clean the units with a slightly damp cloth.

**Analox can offer online gas safety training for your team, just give us a call.**
Q. **What is the maximum number of CO2 sensors and alarms that can be connected to the Ax60+ Central Display Unit?**  
A. A maximum of four sensors, of any combination of CO2 or O2, and a maximum of eight strobe alarms.

Q. **How low should the CO2 sensors be installed?**  
A. CO2 sensors should be installed at approximately 305-457mm (12-18 inches) above floor level. This is because CO2 is heavier than air and will collect near ground level. O2 sensors should be installed at normal working head height.

Q. **What is the maximum room area that will be covered by a single wall mount monitor?**  
A. Approx 80m³, however, this is simply a guideline. We recommend that a full risk assessment is conducted before purchasing our units, so that the correct amount and type of units can be selected.

Q. **Is the Safe-Ox+ affected by atmospheric pressure change?**  
A. No, the Safe-Ox+ has an integral pressure sensor that allows the device to automatically compensate for local pressure changes.

Q. **Can I integrate the Safe-Ox+ with my Building Management System (BMS)?**  
A. Yes, just order the 4-20mA option.

Q. **Is an oxygen safety monitor the same as a nitrogen safety monitor?**  
A. Essentially, yes. When there is a threat of O2 levels being depleted due to a leak of nitrogen gas or liquid, then an O2 safety monitor is required. These are sometimes referred to as nitrogen safety monitors.
